

Electron-Ion Collider Record of Decision

TITLE	APS Magnets for the ESR
PREPARER	Christoph Montag
NUMBER (Supplied by SEG)	EIC-ROD-007
DATE	05/02/2023
AFFECTED WBS/PROJECT AREA	6.04 Electron Storage Ring
STATEMENT OF DECISION (Summary, 1-2 sentences):	
The ESR will be constructed using the APS quadrupoles and sextupoles.	

Description/Purpose:

The ESR will be constructed using the 400 quadrupoles and 280 sextupoles from the ANL Advanced Photon Source (APS), wherever possible. This includes the arcs and most straight sections. A small number (~20-30) of narrower quadrupoles for tight spaces such a IR2, and about 40 long sextupoles (~60cm) need to be designed and procured.

This Record of Decision does not affect the dipole correctors needed for orbit correction.
